

## **Built Environment and Property Prospects Seminar 2020**

The built environment sector in Singapore posted its first employment gain in almost three years.

MTI reported that the construction sector expanded last quarter by 2.9% year-on-year, extending the 2.8% growth in the first quarter of 2019. Over the next decade, the construction sector could sustain the momentum, with average annual growth of the construction industry expected to be at 2.8% through 2028. With a pipeline of mega-projects in Changi East, Paya Lebar Airbase, new Greater Southern Waterfront, North-South Corridor, rail network expansion etc, what are the prospects for industry stakeholders? Join the conversation at the upcoming Built Environment and Property Prospects Seminar 2020.
