## **BCA: Proposed training on type examination of safety components for lifts and model lifts**

Dear ACES Members

Greetings and wishing you a joyous Chinese New Year.

As you are aware when the amended regulations are in effect, SPEs will be required to include type examination of safety components for lifts and type examination of model lifts as part of their certification. To help SPEs with the certification, BCA is planning a 4 days training (divided into 2 parts) specially tailored for SPEs. The first part, to be conducted locally, will focus on understanding the code requirements and how to check the documentation for compliance. The second part, to be conducted overseas, will allow SPEs to witness the actual type examination and how checks are conducted for safety components and model lifts.

### **Cost of training**

Besides the training costs, SPEs would have to bear their own expenses for the local and overseas training including airfare, accommodation, transport and food. The actual costings would depend on the number of participants but rest assured that BCA will work with the trainers to keep the cost affordable.

### **Indication of interest**

Part One of the training is opened to SPEs, PEs who have passed the SPE examination and PEs who are interested in becoming SPEs. As for Part Two of the training, since it will be conducted in laboratory and test tower we are expecting the hosts to limit the number of participants. If that happens, priority will be given to SPEs who have registered your interest with us on a first come first served basis. Remaining vacancies, if any, will then be given to PEs who have passed the SPE examination and PEs who are interested in becoming SPEs.

To help us in planning of the training, we would appreciate it if you could indicate your interest to me at [thomas\\_goh@bca.gov.sg](mailto:thomas_goh@bca.gov.sg) by **24 Jan 2020**.

	Duration	Training Content	Venue	Date	Trainer	Interested? (Yes/No)
Part One	2 days	Understanding code requirement and checks of documents for compliance	Locally	March 2020	One of the Notified Bodies	
Part Two	2 days (excluding travelling)	Witness and learn how type examinations and checks are carried out	Overseas	April, May or June 2020		

Thank you
