

PART-TIME
Diploma in Construction Engineering

NEW

A photograph of two construction workers at a building site. The worker in the foreground is wearing a white hard hat, glasses, and a high-visibility yellow vest over a black long-sleeved shirt. He is holding a clipboard and looking towards the camera. The worker in the background is wearing an orange hard hat and a high-visibility yellow vest over a black long-sleeved shirt. They are standing in front of a large, open steel structure under construction, with a clear blue sky in the background.

Our Part-time Diploma in Construction Engineering is now available in Stackable Modular Certificates

Construction landscape is revolutionising to embrace the global trend of digitalisation. Increasingly, projects are using advanced technology, software applications and new method of construction to improve quality, safety and construction productivity. There is a strong demand for competent professionals to play the key role of managing and supervising these projects.

Whether you are currently in the Built Environment (BE) sector seeking to upgrade your knowledge and progress in your career, or someone who aspire to start a new career in the BE sector, this programme will provide you with the technical knowledge and practical skills to assist in the design works and supervise construction project works in the knowledge based economy.

What's more, graduates of the Diploma in Construction Engineering will be eligible to register as a Resident Technical Officer (RTO) under the Building Control Act.

Modular Certificate A: Certificate in Structural Analysis

April 2020 – September 2020

(Pre-requisite Module for other modular certificates)
