How to Mitigate Potential PreConstruction Risks Before a Shovel Breaks Ground

Join us on the 28 May 2020 at 10.00am (Singapore Time, GMT 8+) to discuss how implementing new technologies for collaboration may reduce risk and allow some aspects of construction to continue. This webinar session will dive into the reasons why Preconstruction is the new competitive advantage, while looking at some examples of contractors who have prioritised the optimisation of their preconstruction processes with digitisation and the results recognised across their projects.

We are pleased to invite construction professionals to the inaugural edition of BuildTech Asia Digital Series.

WEBINAR REGISTRATION

Date: 28 May 2020

Time: 10:00am to 11:00am
(Singapore Time, GMT 8+)

Fees: Complimentary by invitation only

Speaker:

Nicholas Childs
Autodesk Construction Solutions

Moderator:

Sonny Andalis
Singapore Institute of Building Limited

Webinar Sponsored by:

With Assemble, BIM 360, BuildingConnected and PlanGrid, AutoDesk had brought together the most powerful portfolio of construction management software products in the industry. They support workflows spanning all phases of construction, from design, to planning, to building, to operations in a way no other company can. Construction data now seamlessly flows across the lifecycle and is available to the teams in the right place at the right time. You can start in your authoring tools, collaborate across the team push plans and models to preconstruction, quantity takeoff and procurement, and directly push that data to your project management and field teams.

Exhibitor Spotlight

We are a one-stop-shop providing all-around solution for material handling, warehouse equipment, storage racking systems, and personal protective equipment. We are recognized as one of the pioneers in distributing Lithium Forklifts in Singapore.

We also distribute other amazing products that boost operations and promote safety. Our ultimate goal is to encourage a working environment that increases productivity and safety while minimizing operating costs.

TKN MANUFACTURING

We are TKN Manufacturing Co.,LTD, a manufacturer and distributor the precast concrete accessory. We specialize in the production of magnetic products. Especially, Shuttering magnet and rubber recess former magnet. In order to reduce costs, reduce labor, reduce time and reduce work procedures.

Precast Tunnel Segments, Segmental Box Girders, Precast and Prestressed Sleepers, Industrialised Bilding

System (IBS) products

(precast column, precast beam, precast parapet wall, precast staircase, precast refuse chute, precast double tee slab, precast waffle slab, precast hollow-core slab etc) Reinforced Concrete Jacking Pipes and other custom-made precast products

Newera

The AERO-Advance Smart Vacuum Lifter is equipped with well thought-out functions such as the intelligent warning device, the built-in automatic power saving system and the new safety spiral hoses, which prevent the cables from tangling when the device is turned or adjusted. The built-in hot-dip galvanised, solid steel trusses are particularly durable and offer lasting protection against corrosion. The innovative lifting device series can lift up to 1,200 kg, depending on the version.

With high flexibility of customisation on the design, it is tailored to your application. This AERO-Advance vacuum lifter can be optimally used for wide industries.

Denka

Denka is a chemical company that supplies Special Cement Additives which are composed mainly of CaO , SO_3 , and Al_2O_3 . By carefully controlling the composition of these 3 components, the specific chemical properties and characteristics of each special cement additive are obtained. One of our products is Denka CSA, a high performance expansive additive which improves the durability and appearance. It also reduces cracking in concrete, thus able to enjoy joint-less slab on large area by its crack reduction properties.
