SUSTAINABILITY

Certification Course for

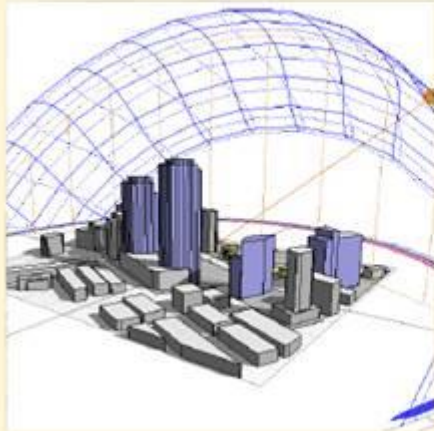

GREEN MARK ACCREDITED PROFESSIONAL (FACILITIES MANAGEMENT) [GM AP(FM)]

E-Learning

The aim of the Certification Course for Green Mark Accredited Professional (Facilities Management) is to equip participants with the knowledge and skills to improve and implement sustainable measures and technologies in an existing building. Participants will learn how a building's energy consumption and environmental impacts can be minimised during the building life time, and to conduct Green Mark Assessment for existing building.

Commencing 27 July 2020

SOLAR MODELLING

Participants will learn the concept of solar geometry in the context of different climate zones, sun path diagrams and stereographic projections as a means to understand and read solar geometry and use Ecotect as a tool to demonstrate the impact of solar geometry on building facades and in turn the indoor space.

Commencing 10 September 2020

M&E ENGINEERING

LIFT AND ESCALATOR COURSE FOR INSPECTORS

Participants will gain in-depth knowledge on the inspection of the lift and escalator installation and maintenance works in accordance to the prevailing standards.

Commencing on 29 September 2020

QUALITY

**Internal Quality Audit based on
ISO 9001 (QUALITY), ISO 14001 (ENVIRONMENT)
& ISO 45001 (HEALTH & SAFETY) STANDARDS**

This course aims to equip Internal Auditors with the knowledge and skill required to assess, monitor and measure the performance of an organisation's integrated QEHS Management system. With the introduction of ISO 45001, the course covers latest updates of the new editions and highlights the necessary revisions to ensure smooth transition from current version.

Commencing on 28 July 2020

**Good Industry Practices
PAINTING**

This course complements the guidebook, by providing practical suggestions on how good quality painting can be achieved on site. Common defects associated with paints, their causes and preventive measures are also covered in this course.

Commencing on 25 August 2020

REGULATIONS

Essential Knowledge in

LOCAL REGULATIONS AND CONSTRUCTION PRACTICES

This course will provide site supervisors essential knowledge in the areas of regulatory requirements, safety regulations, environmental management at construction sites, code requirements on construction practices and site supervision. This course is also useful to engineers with foreign qualifications, and others who wish to be updated on local construction practices.

Commencing on 14 September 2020
