

Dear Members

In conjunction with this year's Archifest festival; 'Architecture Saving Our World' the Small and Medium Architectural Practices Committee (SMAP) are presenting another exciting session of the 'Why Architect? Forum 2020' - All of what you have always wanted to know but never dared to ask!

Organised with a panel of professionals ranging from the Architect who runs her/his own practice, to the relevant built environment specialists there will be an enlightening sharing of the role of Architects in the creation of the built structures in which we live, work and play. What goes on in the Architect's mind during the whole process? Behind-the-scenes stories and secrets will be revealed! The 'Why Architect? Forum' hopes to contribute to this bold dialogue by bringing to the public an understanding and appreciation of the profession, as well as our commitment to the Planet and Humanity.

The event's details as follows;

Why Architect? Forum - All of what you have always wanted to know but never dared to ask!
