

ELEVATING BE SECTOR
TO THE NEXT LEVEL

For our Built Environment sector to continue to deliver high-quality projects in a safe, efficient and sustainable manner, continual transformation of our systems and processes will be needed. Implementing sound risk management systems, supported by a skilled workforce that embraces innovation, will provide a strong foundation to elevate the BE sector collectively to the next level.

SAFETY & REGULATORY

(bizSAFE Level 2) Develop A Risk Management Implementation Plan

Commencing 28 October 2020

Identifying safety/health hazards and implementing appropriate safety measures are part of the requirements to meet WSH (Risk Management) Regulation. This course will help you to acquire the critical skills in risk assessment and management

to implement a successful risk management plan for construction activities.

Managing Noise in Construction Sites

Commencing 3 November 2020

It is essential to implement a good noise management and control system at construction sites in order to meet NEA and MOM regulations that construction works must not affect neighbouring residents and businesses at the site.

QUALITY

Maintenance of Electrical Equipment for Facilities Maintenance Personnel

Commencing 20 October 2020

Be equipped with the skills to maintain major electrical equipment for improved reliability and lifespan. Proper electrical equipment maintenance will also ensure greater safety

for users and maintenance personnel.

CONQUAS Training for Builders

Commencing 21 October 2020

Specifically designed for builders to acquire updated knowledge to conduct in-house CONQUAS assessment for your projects.

PROJECT MANAGEMENT & CONTRACTS

Finance for Non-Finance Professionals in the Built Environment

Commencing 11 November 2020

The ability to analyse and interpret financial data is vital to successful business

and project operations. Facilitated by case studies from the built environment, you will be able to evaluate the financial performance of the organisations.

DESIGN FOR MANUFACTURING AND ASSEMBLY

The Basics of Design for Manufacturing and Assembly

Commencing 16 November 2020

DfMA is a key pillar of Singapore's Construction Industry Transformation Map (ITM). It is a game-changing method of construction which involves construction being designed for manufacturing off-site in a controlled environment, before being assembled on-site.

This course will provide insights into design consideration for DfMA, and illustrates how DfMA can shorten the construction period, improve workmanship and reduce dis-amenities.

INTEGRATED DIGITAL DELIVERY

Certification Course in BIM Modelling (Structure Track)

Commencing 26 January 2021

Certification Course in BIM Modelling (Architecture Track)

Commencing 23 February 2021

Certification Course in BIM Modelling (MEP Track)

Commencing 4 March 2021

Acquire practical BIM modelling skills to start and support a project through BIM, which is an integrated digital collaboration platform for entire building process from designing

to construction to post-construction building management.

SKILLS TRAINING

Crawler Crane Operations

Commencing 14 October 2020

Comprising theory and practical components, the course (available in Mandarin & English) will prepare the participant to be a MOM-registered crane operator (T&Cs apply)

PPVC Lifting Course for Saddle Jib Tower Crane

Commencing 27 October 2020

The rapid development in Prefabricated Pre-finished Volumetric Construction (PPVC) will require crane operators to be skilled in lifting heavier and bulkier components in PPVC. Builders will need qualified and trained crane operators to perform safe PPVC lifting to ensure successful project delivery
