

SAFETY MANAGEMENT PIVOTAL ROLE IN CONSTRUCTION

Safety management remains paramount in any situation. It is the responsibility of the organisations and individuals to ensure projects are delivered with zero incident. Mindset changes, behavioural understanding and risk implementation are pivotal to achieving a safe worksite for all parties.

SAFETY & REGULATORY

(bizSAFE Level 2) Develop A Risk Management Implementation Plan

Commencing 28 October 2020

Identifying safety/health hazards and implementing appropriate safety measures are part of the requirements to meet WSH (Risk Management) Regulation. This course will help you to acquire the critical skills in risk assessment and management to implement a successful risk management plan for construction activities.

Managing Noise in Construction Sites

Commencing 3 November 2020

It is essential to implement a good noise management and control system at construction sites in order to meet NEA and MOM regulations that construction works must not affect neighbouring residents and businesses at the site.

Practical Applications of WSH Legislations in Construction Projects

Commencing 10 November 2020

Facilitated through real-life case studies and court cases, you will gain insights into the legal responsibilities of construction/safety personnel under WSH Act and regulations. The enhanced knowledge will help you to better manage construction site safety.

Applying Data Analytics Approach to Workplace Safety and Health

Commencing 12 November 2020

Understand how data analytics on WSH data can improve overall safety, health performance and productivity in workplaces. Effective safety analytics can predict and prevent workplace safety incidents, thus saving lives, money and organisation's reputation.

Behavioural Safety for the Construction Industry

Commencing 17 November 2020

Behavioural Safety is an effective methodology to improve safety culture through change of individual's behaviour. It is therefore essential to understand the behavioural safety approach to monitor safe vs unsafe individual behaviour at workplace to prevent accidents.
