

WISH TO BE A GREEN SPECIALIST?

In tandem with the Construction Industry Transformation Map (ITM) to shape the future economy of Singapore, sustainable development remains a national and global priority given the resource constraints, demands of urbanisation and global challenge of climate change. Competent professionals in design, maintenance and management of green buildings is even more crucial to address these challenges as well as capture opportunities in driving competitive and growth in local and international markets.

BCA Academy is offering the following certification courses:

- **Green Mark for Advanced Accredited Professional (GMAAP) Certification Course**

This course covers the design fundamentals of new buildings through the adoption of passive and active strategies such as efficient building envelope, effective daylighting and natural ventilation, energy efficient air-conditioning system and artificial lightings etc.
