### Topic

**Bridging the Gaps - Improving communications with FIDIC member associations - FIDIC Committee Webinar Series**

### Description

This webinar, organised by the FIDIC Membership Committee, will provide an opportunity for member associations (MAs) to discuss how FIDIC can improve the effectiveness of its communications and engagement with members to ensure that MAs feel better connected to FIDIC and that FIDIC is able to get its message across to MAs' member firms thereby increasing the effectiveness and visibility of FIDIC in the global industry. The webinar will look at examples where members have benefited from FIDIC's help in promoting events and initiatives to a wider global audience and where collective working globally has led to successes. This webinar should be well worth attending to find out more about how FIDIC can work together with its MAs to be more effective.

### FIDIC committee webinar series

The relaunch of FIDIC's revitalised committee structure last year means that FIDIC is now much better placed to make a positive impact on and widen its influence in the global infrastructure industry. To highlight some of the key areas being covered by the work of these committees, a series of nine webinars has been organised across a range of industry key issues including communications, diversity and inclusion, the use of FIDIC contracts in emerging countries, combating corruption, quality, net zero and best business practice in a post-Covid world. These webinars are free to attend and open to all and they are expected to be well attended by global industry professionals. Details of the FIDIC committee webinar series are linked below.
