

Given the resource constraints, demands of urbanisation and global challenge of climate change, sustainable development remains a national and global priority. Competent professionals in design, maintenance and management of green buildings who are accredited under the 'Green Mark Professional Qualification Scheme'

are in strong position to address these challenges and capture opportunities available in local and international markets.

## Certification Course for Green Mark Advanced Accredited Professional (Facilities Management) (GM AAP (FM))

**Commencing 23 February 2021**

This course focuses on downstream management and operation of buildings through the implementation of smart FM operations, optimal maintainability design, strategies to encourage business sustainability and continuity through performance contracting etc.

## Certification Course for Green Mark Advanced Accredited Professional (GM AAP)

**Commencing 9 March 2021**

The course aims to equip you with the knowledge in design fundamentals of new buildings through the adoption of passive and active strategies such as efficient building envelope, effective daylighting and natural ventilation, energy efficient air-conditioning system

and artificial lightings etc.

## PROJECT MANAGEMENT & CONTRACTS

### Certification Course in Construction Law & Contracts
