

URBAN SUSTAINABILITY R&D e-Symposia 2021

EMERGING STRONGER: INNOVATIVE CITIES OF TOMORROW

Following up from our Opening Webinar, we are glad to bring to you our first research thematic webinar focusing on “Resilience”!

Infrastructure resilience is becoming more important as Singapore faces a growing stock of aging national infrastructure, manpower crunch, and challenges brought about by climate change.

In this webinar, expert speakers will share cutting edge technologies that can optimise facilities management processes and enhance estate maintainability and performance. Join us to learn more about emerging global trends and how we can leverage digital technologies to enhance our infrastructure resilience!
