

## HDB BRI-SGBC Webinar: Towards 2030 – Green, Smart & Sustainable Living

Thursday, 12 August 2021 | 3:00PM - 5:00PM (SGT)

With the launch of the Singapore Green Plan 2030 in early 2021 – a “whole-of-nation movement” to advance the national agenda on sustainable development to tackle climate change challenges, it is set to further shape the way people live, work, study and play.

Tengah Town is set to become the model for low-carbon, smart-enabled and energy-efficient townships. With a suite of green features and smart technologies, it would raise the standards of HDB living to new heights, creating a more comfortable living environment for residents.

To mitigate the impact of climate change, everyone can do their part for a greener tomorrow. Co-organised by BRI and SGBC, this joint webinar will touch on various innovative sustainable initiatives and weaving greenery into neighbourhood landscapes to promote a strong sense of place and well-being for residents. Join us and our panel of speakers for insights towards the future of smart and sustainable living for a greener Singapore.
