

# Effective Project Management: Delivering Successful Projects

22 October 2021, Friday | 9am to 5.30pm

It is not uncommon to see real estate projects that are poorly managed, resulting in project delay and cost overrun. When this happens, the financial impacts to the company are great. The success of a development project depends largely on the effectiveness of the Project Manager managing it. It is important for the Project Manager to upgrade the skills of project

management, so that he will be able to contribute positively to the success of the projects.

This ***Project Management*** course adopts a developer's perspective. It will give participants an overview of the entire property development process from inception to completion, as well as key tools and techniques that they can utilize every day. With these relevant skills and knowledge, the participants will be able to manage their projects more effectively to achieve the planned cost, time and quality objectives, and boost the company's productivity.

### **Who Should Attend**

Project Managers, Development Managers, Construction Managers, Architects, Engineers, Contract Managers, Quantity Surveyors.

Including those who would like to learn about the developmental process of a real estate property

### **Trainer's Profile**

**Er. Tan Joo Chuah**

**Project Management Consultant & Trainer**

Er. Tan Joo Chuah (JC Tan) is a veteran Project Management Consultant with 40 years of real estate development experiences in Singapore and

China. He started his career with HDB and was a Senior Principal Project Manager when he left the organization.

JC was the General Manager (Projects) for Keppel Land China. He was also the first Managing Director for SIPM Consultants (a wholly owned subsidiary of Surbana-Jurong), and Director (Projects) for Raffles Medical Group.

JC was the 2nd Vice-President for the Society of Project Managers, Singapore. He is also a Fellow member of the Society. He has been presenting papers on Project Management at international seminars and conferences. He has also delivered keynote addresses at the China International Construction Project Management Summit meetings.

JC is a Part-Time Lecturer at the School of Civil and Environmental Engineering, Nanyang Technological University. He holds a Master of Science (With Distinction) in Construction Engineering from University of Leeds, UK; and is a Professional Engineer (Civil) since 1990. He is also a certified ACTA Trainer (by Institute for Adult Learning, SUSS).
