

A SERIES OF 3 WEBINARS ON "CITY IN NATURE"

COMPLETED

ECOLOGY of CITIES: ENHANCING GREENERY AND BIODIVERSITY IN OUR ECOSYSTEMS

ECOLOGY for CITIES: NATURE-BASED SOLUTIONS FOR URBAN SUSTAINABILITY

6 August 2021 | 4pm - 5.30pm

COMING SOON

ECOLOGY of CITIES: MANAGING HUMAN-NATURE RELATIONSHIPS IN THE CITY

Greenery pervades Singapore's urban landscape today. As we move towards becoming a "City in Nature", we will further integrate nature into our city to strengthen Singapore's distinctiveness as a highly liveable city, while mitigating the impacts of urbanization and climate change.

In this second of three webinars on "City in Nature", we will discuss how we can synergize our urban capacities with the potential of nature. This includes harnessing benefits and characteristics of nature in urban planning, and emulating nature for urban sustainability solutions.

Speakers

Planning OUR "City in Nature"

Mr. Cheong Kok Hwee

Director (Park Planning),
National Parks Board

Harnessing Urban Natural Capital: A Tropical City Study

Associate Prof. Dan Friess

Deputy Director (Centre for Nature-based
Climate Solutions);
Dean's Chair (Department of Geography),
National University of Singapore

Coastal Protection: Harnessing Nature's Typologies in Singapore

Dr. Karenne Tun

Director (National Biodiversity Centre -
Coastal & Marine and Terrestrial),
National Parks Board

Mr. Jonathan Tan

Manager (National Biodiversity Centre -
Coastal & Marine),
National Parks Board

Moderator

Dr. Nigel Goh

Director (CUGE Research)
National Parks Board
