- Programmers & Developers
- Graduates & Students

REGISTER NOW

As more industries and organisations accelerate their digital transformation, tech staff retention is becoming more challenging and intense.

The rapid change of job competencies and the organisational structure will play a key role in shaping the capabilities within each organisation. Geospatial innovation and location intelligence-based solutions are a core part of the evolving digital landscape and require a mix of skills, which do not always fit neatly into one frame. From the traditional backgrounds of GIS and surveying new skills sets range from AI and AR to robotics and data analytics.

Hear what our industry practitioners have to say and learn the Dos and Don'ts – in building talent and capacity in this arena as we transform for tomorrow.

Moderator

Ms. Yean Cheong
Executive Director,
SGTech

Panellists

Mr. Andrew Brockfield
Vice President of Sales, APAC
Planet

Ms. Chelvin Loh
Director,
Jobs-Skills Insights Division,
Skills Development Group,
SkillsFuture Singapore
