

EMERGING SKILLS

HOW TO BUILD IN 2030

Automation is widespread, sustainability is critical, carbon emissions are heavily restricted, and our buildings are made in factories. Sustainability and efficiency will drive how we build, successfully in 2030.

WHAT IS DIGITAL TWIN?

This video shares what digital twin is, and how it works. A digital twin refers to a virtual model of a process, product or service. It is a bridge between the physical and digital world. This pairing of the virtual and physical worlds allows analysis of data and monitoring of systems to identify problems before they even occur, prevent downtime, develop new opportunities, and even plan for the future by using simulations.

SGUnited Skills Programme

Diploma (Conversion) in Sustainable Design (Built Environment)

Starting in
OCTOBER
2021

Sustainable development will be one of the key engines of growth for Singapore's next wave of economic development. The Singapore Green Plan 2030 charts ambitious and concrete targets over the next decade to achieve long-term net zero emissions aspiration too.

This 6-month full-time course is designed for unemployed Singaporeans who are keen to upscale and acquire new skills to ride on the next wave of economic development.

Help spread this opportunity to someone you know that may need help. They will need a new start.

KEY FEATURES

- Industry-relevant curriculum to enhance employability
- Training allowance
- Highly subsidised course fee
