

URBAN SUSTAINABILITY

R&D e-Symposia 2021

EMERGING STRONGER: INNOVATIVE CITIES OF TOMORROW

The Built Environment (BE) sector of today is vastly different from that of a few decades ago. Rapid technological advancements, an ageing workforce, adverse weather conditions, and the ongoing COVID-19 pandemic have all altered the way we build. While it is difficult to forecast precisely how the future will unfold, it is necessary to try to anticipate and prepare for what lies ahead.

In this webinar, you will learn about the challenges and opportunities that may arise during your company's transformation and innovation path through sharing by technology thought leaders on wide ranging topics.

Distinguished Speakers
