

# Smart Buildings Conference 2021

02 - 03 November, 08:30 - 13:00 SGT  
Fully Virtual Format

Since the world's first intelligent building was declared in 1983, how far have we come in nearly four decades? Around the world, there are various schemes designed to encourage greener and more energy efficient approaches within the built environment.

One of the global forerunners in smart building development today is Singapore.

NOVEMBER 2021

# 2&3

## Be a part of our leading conference in Southeast Asia

Join us at the Smart Buildings Conference 2021 as we analyse the future of intelligent infrastructure and why nations like Singapore continues to lead the way.

In the two half-day conference, you will be able to hear first-hand practical insights and relevant case studies from top market leaders in Singapore and Asia-Pacific. All sessions are live where you can ask your questions and interact with the expert speakers and other delegates. The sessions are also available on-demand after the conference so you can catch up what you have missed or review any of the sessions again.
