

# IDD SYMPOSIUM 2021

Optimizing IDD Through Collaboration - Establishing an Effective Value Chain

**25 NOVEMBER 2021  
THURSDAY**

**9AM TO 6PM**

**REDAS IDD Symposium 2021** will be held on **25 November** this year. It will be conducted in a hybrid format, with the physical venue at Marina Bay Sands. **Mr Kelvin Wong (CEO, Building Construction Authority) and Mr Chia Ngiang Hong (REDAS President) will give the Opening Address and Welcome Address respectively.**

Our symposium seeks to share knowledge on and promote IDD and its benefits, and showcase successful IDD use cases/best practices and relevant technologies to the Built Environment sector including developers and their value chain partners. We have lined-up a very exciting programme and invited prominent players of the industry who will be sharing on their actual experiences across the four stages of IDD deployment – Digital Design, Digital Fabrication, Digital Construction and Digital Asset Management.

This year's IDD symposium will have an added focus beyond the usual objectives. REDAS is working closely with BCA, Enterprise Singapore and industry partners towards the creation of a Developer-Centric Integrated Digital Delivery Dashboard. The dashboard will allow developers to better monitor and manage their projects live online across the four stages of IDD deployment working collaboratively with their value chain partners. With the dashboard and implementation guide, we hope to make it easier for mid-size and smaller developers to adopt and implement IDD, and this in turn to catalyse collaborative IDD with single source of truth across their value chains. At the coming event,

we will be sharing on the results of the IDD gaps analysis survey from the REDAS-KPMG collaboration and also preview the IDD dashboard prototype.

We are expecting a very good turn up comprising mainly Heads, CEOs and senior management of relevant TACs, professional bodies and public agencies, and management & staff of developers, their value chain partners, vendors, etc. to attend this symposium.

Our registration will be opening soon. We look forward to seeing you. Please save the date and keep a lookout for our next EDM to register! Thank you.

Separately, at the Integrated Digital Delivery (IDD) Pavilion @ ArchXpo 2021, It showcases companies providing digital technologies that integrate work processes and connect stakeholders working on the same project throughout the construction and building life-cycle and would include design, fabrication and assembly on-site, as well as the operations and maintenance of buildings.
