Registration for **REDAS Integrated Digital Delivery (IDD) Symposium 2021** is now open.

Themed '***Optimizing IDD Through Collaboration – Establishing an Effective Value Chain***' and to be held alongside [Architecture & Buildings Services Exhibition 2021](#) on **25 November 2021**, the symposium will be conducted in a hybrid format with the physical venue at Marina Bay Sands Expo and Convention Centre. **Mr Kelvin Wong (CEO, Building & Construction Authority) and Mr Chia Ngiang Hong (REDAS President) will give the Opening Address and Welcome Address respectively.**

**REDAS IDD Symposium** inaugurated in 2014 is one of our flagship annual conferences. It seeks to share knowledge on and promote IDD and its benefits, and showcase successful IDD use cases/best practices and relevant

technologies to the Built Environment sector including developers and their value chain partners. We have invited prominent players of the industry who will be sharing on their actual experiences across the four stages of IDD deployment – Digital Design, Digital Fabrication, Digital Construction and Digital Asset Management. KPMG will also present the findings of the gaps analysis survey and interviews on IDD it recently undertook working in collaboration with REDAS.

This year's IDD symposium will have an added focus beyond the usual objectives. You may be aware that REDAS is working closely with BCA, Enterprise Singapore and industry partners towards the creation of a Developer-Centric Integrated Digital Delivery Dashboard. The dashboard will allow developers to better monitor and manage their projects live online across the four stages of IDD deployment working collaboratively with their value chain partners. A few of the invited speakers will be sharing their experiences on how using dashboards have benefited their operations. At the coming event, we will preview the IDD dashboard prototype and hope to garner valuable feedback for improvements.

In order to establish a successful, holistic and conducive IDD environment, there needs to be a collaborative and close-knitted ecosystem that brings the key players and stakeholders together – ranging from regulators, developers, architects, contractors, engineers, surveyors, facility managers, and more. We hope the REDAS IDD Symposium and Developer-Centric IDD Dashboard are meaningful approaches to facilitate and foster this.

We look forward to the strong support of members, industry players and all relevant stakeholders to sign up for the symposium. Together, we can help to accelerate digitalisation, industry transformation and strengthen industry resilience and sustainability.

**Register now to reserve your seat!**

Separately, at the Integrated Digital Delivery (IDD) Pavilion @ ArchXpo 2021, It showcases companies providing digital technologies that integrate work processes and connect stakeholders working on the same project throughout the construction and building life-cycle and would include design, fabrication and assembly on-site, as well as the operations and maintenance of buildings.
