

We are pleased to invite you and all ACES members to participate in our upcoming webinar on Introduction to Digital Delivery Management (DDM) Accreditation Scheme.

At this webinar, we provide an overview of the DDM Accreditation Scheme, which is based on the Skills Framework for the Built Environment. We will also explain the modes of assessment, assessment criteria and approach.

We appreciate if you would extend this invite to all ACES members so they can benefit from the recognition of digital skillsets provided for by this structured framework.

The **Digital Delivery Management (DDM) Accreditation Scheme** offers recognition to prevalent digital delivery job roles available in construction projects. This structured framework recognises your digital skillsets and can help you plan for future career advancement and salary negotiations.

This introductory webinar provides an **overview of the DDM accreditation scheme**, which is based on the Skills Framework for the Built Environment. We will also explain the modes of assessment, assessment criteria and approach.

Two introductory sessions are organised for your convenience. Join us on either one of the dates: 7 or 15 December 2021, at 4pm.

If you have started on your application for DDM Accreditation but unsure of how to progress, join us for the clinic sessions on 10 and 16 December 2021 at 4pm, where we will discuss your application status.

For detailed information, visit [ddm.buildingsmartsingapore.org](http://ddm.buildingsmartsingapore.org).
