Plan Our Future SG

Reimagining Singapore as a space for our dreams

How will Singapore look like over the next 50 years and beyond? Visit our exhibition for the Long-Term Plan Review showcasing planning concepts and strategies to chart Singapore's future development! We developed these strategies based on future trends and challenges, as well as ideas shared by Singaporeans over our year-long public engagement.

[Get more details](#)

More homes for new needs and aspirations

Providing inclusive and accessible homes for all continues to be central to our housing goals. Our long-term planning strategies envisage more homes of different varieties, while keeping in mind our natural and heritage assets, as well as future needs.

Working anywhere and everywhere

Our workspaces will continue to evolve as the global economy grows in new and unexpected ways. Find out how we will continue to build up our islandwide polycentres, rejuvenate the city centre, and plan for more flexible workspaces to support innovation.

Building a more resilient city

Securing a sustainable future is a key tenet of our long-term plans. We will continue to enhance climate resilience, support the goal of a low-carbon city, and optimise our land resources such as exploring underground caverns for utilities.

Shape a Distinctive City

Going green and blue

Explore our islandwide Green and Blue Plan that illustrates how we steward our natural capital with a science-based approach, integrate multi-functional green and blue spaces within our urban landscape, and enhance climate resilience. It will also guide more detailed planning for developments downstream.

Conserve Built Heritage

A loveable city for all

Check out our new Heritage and Identity Structure Plan that will guide long-term efforts to protect and sensitively integrate built heritage in our city. We will also preserve and enhance the character of five Identity Corridors, corridors that are defined by their distinctive characteristics in our city.

Enliven Public Spaces

Playing it right

We are exploring how play offerings can be better integrated with other land uses in neighbourhoods, making recreational spaces more accessible and public spaces more lively. This includes under-utilised open spaces such as car park rooftops, void decks, and vacant state lands.

Go Car-Lite

Moving towards a more connected network

By the 2030s, eight in 10 households will be within 10 minutes' walk of a train station. In addition to strengthening public transport and active mobility, we will pilot new ideas for more efficient delivery as well as leverage technology such as Autonomous Vehicles.
