Built Environment Technical Seminar Series #2

ACCELERATING DECARBONISATION IN THE BUILT ENVIRONMENT THROUGH SUSTAINABLE MATERIALS

5 Aug 2022 | 2pm – 5pm | BCA Braddell Campus, Auditorium (T1-1)

The Singapore Green Plan 2030 is a whole-of-nation movement to advance Singapore's national agenda on sustainable development. To pave the way towards a low-carbon Built Environment (BE), we set to raise the sustainability standards through the Singapore Green Building Masterplan (SGBMP); dubbed "80-80-80 in 2030", the SGBMP captures our collective commitment to pursue more ambitious standards in our BE sector to meet global climate change commitments. In this seminar, participants will gain insights on cutting-edge sustainable and innovative building materials, as well as how quantifying carbon footprint could help to accelerate decarbonisation efforts.
