Building Engineering Seminar 2022 **BUILDINGS: WHAT CAN GO WRONG**

30 Sep 2022, Friday • 2:00pm-5:30pm • BCA Braddell Campus, T1-1

While structural safety of buildings in Singapore has been enhanced over the years, building failure during construction do occur from time to time. With land use being intensified, the structural system of buildings are becoming more complex, often involving multi-level of load transfer.

The publication Buildings: What Can Go Wrong is a compilation of past failures in projects within Singapore, some of which resulted in loss of life and property damage. A curated list of local cases from this book and some overseas cases will be shared during the seminar. As mistakes in design and construction are being repeated, it is imperative that we continuously learn from past events; and for these lessons to serve as a reminder to the industry as we strive for a safe Built Environment.
