SGBC Webinar: Sustainable Data Centres

Sustainability is now a critical factor in the data centre market with countries across the globe seeking solutions to reduce the inimical emissions and environmental impact of data centres. From Hydrotreated Vegetable Oil (HVO) to restrictions on new build data centres, the picture is different across Southeast Asia with various measures and legislation mirroring the fragmented growth of the sector.

In this SGBC Webinar, SGBC Members Kohler and ARUP will explore how the net-zero agenda is evolving for data centre design and backup power in the region.

Topics & Speakers

Green Data Centres

by Trevor Hall

Associate, Arup
