

## Upgrade your Competency in Built Environment Sustainability

The Singapore Green Building Council (SGBC) is launching the **Green Mark Associate** (GMA) foundation-level accreditation for new industry entrants or non-technical built environment related professionals seeking to:

- Pursue a career in the greening of the built environment
- Demonstrate competency in the fundamentals of Singapore green building

This accreditation is part of the [Green Mark Professional Qualification Scheme](#) - a recognised symbol of merit in the Built Environment (BE) Sector.

GMA certification denotes a core understanding of sustainability, green building, the national environmental sustainability legislative framework as well as the key qualities of a green built environment. The Certification Course covers a range of topics that includes energy efficiency, green building materials and technologies, indoor environmental quality and water conservation, and is intended to enhance and reinforce knowledge on built environment sustainability.

The GMA certification - awarded upon completion of the Certification Course - demonstrates a working knowledge of green building fundamentals, key regulations as well as trends and developments, which can help open doors to a growing pool of job opportunities available in built environment sustainability.

## Certification Course for Green Mark Associate: Introduction to Built Environment Sustainability

Course fees (incl. GST): \$421.20

1st Intake: 27 March to 27 April 2023

---

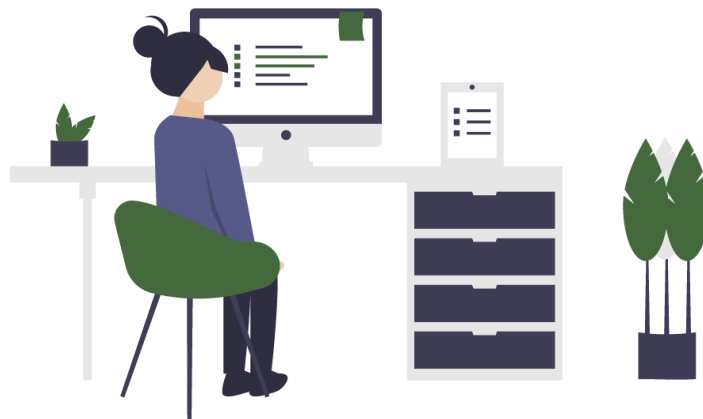

This [3-part GMA certification course](#) will cover various topics, including energy efficiency, green building materials and technologies, indoor environmental quality and water conservation, and is intended to enhance and reinforce

knowledge on built environment sustainability.

All three parts must be completed in order for the GMA certification to be awarded.

27 March to 20 April

## Part 1: Asynchronous Online Learning

Learn about built environment sustainability, green building strategies and Singapore's legislative framework at your own time and pace with the GMA's asynchronous e-learning package.

27 March to 20 April

## Part 2: Online Assessment

Pass the structured online assessment.

27 April 2023

## Part 3: Applied Learning Workshop

Attend an in-person workshop led by a Green Mark Accredited

Professional to learn about application of sustainable strategies and features in a holistic manner and learn from exemplary green building case studies.
