About the Bootcamp

Are you interested in standardisation work and would you like to experience the development of an international standard? If yes, the "Standard in a Day" Bootcamp is the right place for you!

In this session, you will experience all facets of the development process of an international standard under professional guidance from IEC. You will take part in a simulated meeting of an IEC technical committee and experience how consensus is reached when developing a standard. You will be involved through a mix of training, discussions and role playing on the development of a standard, from a new proposal (NP) to committee draft (CD) and final draft international standard (FDIS).

Who are the Trainers?

Mr Dennis Chew, Regional Director of the International Electrotechnical Commission (IEC) Asia-Pacific Regional Centre (APRC) and his colleague will conduct the bootcamp.

Who Should Attend?

- Young professionals (aged 40 and below) preferably with work related to electrotechnical areas.
- Newcomers or existing Standards Partners keen to learn and be involved in IEC standardisation activities

How to register:

Interested participants can register online using the weblink (here) or via the QR code:

"Standard in a Day" Bootcamp

Experience the development of an international standard

Date: 4 September 2023 (Monday)

Time: 9.00am to 5.00pm (Registration at 8.45am)

Venue: Enterprise Singapore

Singapore Room, level 9, 230 Victoria Street,

Bugis Junction Office Tower,

Singapore 188024

Dress code: Smart casual

Registration fee: Free

Organised by: Singapore National Committee of IEC

Registration closes on 28 August 2023 (Monday)

As seats are limited, please register early.

Programme

Time Topic 8.30am Registration 9.00am Introduction and administrative details 9.30am International standardisation (IEC) - Standardisation process - Roles in standardisation - Tools in standardisation 10.30am Coffee break 10.45am Working Group (WG) meeting, start of a new standardisation project 11.00am National discussion in countries deciding on comments 12.00pm Lunch break 1.30pm Discussion of Compilation of Comments (CC) in WG and adjusting draft standard accordingly 2.15pm Discussion of Committee Draft Vote (CDV) in mirror committee meetings giving comments and establishing national decision 3.15pm Coffee break 3.30pm WG meeting to integrate CDV comments into Final Draft International Standard (FDIS) 4.30pm FDIS to International Standard - National Adoption Wrap-up and conclusions

About the Singapore Standardisation Programme

As the national standards body, Enterprise Singapore oversees the Singapore Standardisation Programme through an industry-led Singapore Standards Council (SSC). The SSC collaborates with key stakeholders including industry, professional bodies and government agencies to advise on policies, strategies, initiatives and procedures to develop, promote and review national standards.

The SSC represents Singapore in key international organisations such as the International Organization for Standardization (ISO) and International Electrotechnical Commission (IEC).

About the International Electrotechnical Commission (IEC)

The IEC is a global, not-for-profit membership organisation that brings together more than 170 countries and coordinates the work of 20,000 experts globally.

Singapore has been a full member of the IEC since 1990 and participating actively in the IEC standards development work such as solar photovoltaic, semiconductor devices and marine energy on wave, tidal and other water current converters.

Enterprise Singapore

The Singapore Standardisation Programme is managed by
