

MASTERING DIGITAL SKILLS OF THE FUTURE

In today's fast-evolving digital landscape, the ability to master the digital skills of the future isn't just an option but a necessity, especially for professionals in the Built Environment (BE) sector. The fusion of technology with traditional practices is reshaping BE sector, making digital proficiency a cornerstone for success.

Read this article to find out how our alumni have leveraged their digital skills to enhance productivity, sustainability, and career prospects.

Building Your Digital Skills through our Integrated Digital Delivery (IDD) courses

In an era where the BE sector is evolving rapidly, acquiring digital proficiency has become imperative. Our programmes are here to empower you with these crucial skills. Don't miss out on the opportunity to stay at the forefront of this dynamic field. Join our courses today and unlock a world of possibilities in the BE sector. Your digital future starts here!

Certification Course in BIM Management

This 4-day Certification Course on Building Information Modelling (BIM) Management is designed to provide industry professionals with the knowledge to implement and execute a BIM project.

Commencing: 25 September 2023

[REGISTER HERE](#)

Specialist Diploma in Building Information Modelling (SDBIM)

Learn to strategically implement BIM for enhanced communication, collaboration, and optimised project processes, maximising productivity and returns with our SDBIM programme.

Modular Certificate B - Certificate in BIM Construction and Coordination

Commencing: 2 October 2023

[REGISTER HERE](#)

Specialist Diploma in Computational BIM (Building) (SDCBB)

Our SDCBB programme, consisting 2 modular certificates, equips BE professionals with skills and knowledge to apply computational BIM tools for automation, optimisation and validation of different types of project.

Modular Certificate B - Certificate in Computational BIM Applications (Building)

Commencing: 2 October 2023

[REGISTER HERE](#)

Workshop on Computational BIM

This 2-day online workshop covers the practical applications, modelling workflow and integration of model with BIM software to enhance the design process.

Commencing: 14 & 15 November 2023

UPCOMING COURSES...

Basic Concept in Construction Productivity Enhancement

This half-day course is meant to drive productivity awareness to mostly small companies registered under BCA's Contractors Registration System in selected categories and specific grades.

Construction Contract Drafting & Dispute Resolution

This 2-day course is to provide a proper training platform to impart the necessary technical skills and requisite legal knowledge in contract drafting.

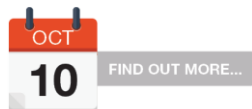

Certification Course on Driving Energy Performance in Super Low Energy (SLE) Buildings

This 2.5-day course aims to keep professionals abreast on the raising standards in energy performance of our built environment and the latest GM:2021 requirements to achieve SLE building standards.

Code Compliance in Development Control (DC) and Building Plan (BP) Submission

This 1-day course provides an understanding on the submission process during Development Control Stage and Building Plan Stage.

Construction Law and Contracts: Principles and Application

This 36-hour certification course provides an understanding of construction contracts.

Submission Requirements & Code Compliance to Obtain Temporary Occupation Permit (TOP) and Certificate of Statutory Completion (CSC)

This 1.5-day course provides an understanding on the submission process during Temporary Occupation Permit (TOP) and Certificate of Statutory Completion (CSC) Stage.
