

Workshop information

Keen to learn the step-by-step the process of how Singapore Standards are developed? Interested to find out how the inputs from industry players and other stakeholders are taken into consideration when developing a standard?

As a continuation from the Young Professionals Standards Awareness Workshop, this upcoming Standards Induction Workshop aims at sharing how Young Professionals can come on board the Singapore Standardisation Programme to contribute to the development of standards, and to further their professional knowledge and network. If you have not joined us at previous awareness workshops but keen to learn about our programme, this workshop is for you too!

In this workshop, you will:

- experience key facets of the development process of a standard,
- take part in a simulated Working Group meeting, and
- experience how consensus is reached when developing a standard.

You will be involved in a mix of training, discussions and role playing on the development of a standard.

Who Should Attend?

- Young professionals (aged 40 and below)
- Newcomers or existing Standards Partners keen to learn and be involved in standardisation activities

How to register

About Singapore Standardisation Programme

As the national standards body, Enterprise Singapore oversees the Singapore Standardisation Programme through an industry-led Singapore Standards Council (SSC). The SSC collaborates with key stakeholders including industry, professional bodies and government agencies to advise on policies, strategies, initiatives and procedures to develop, promote and review national standards.

The SSC represents Singapore in key international organisations such as the International Organization for Standardization (ISO) and International Electrotechnical Commission (IEC).

The Singapore Standardisation Programme is overseen by 

About Standards Development Organisations

Enterprise Singapore appoints Standards Development Organisations (SDOs) to develop and promote national and International standards.
