

## REDAS IDD SYMPOSIUM 2023

Greetings from REDAS,

This year, REDAS will be holding the 9th Integrated Digital Delivery (IDD) Symposium on 15 Nov 2023 at MBS, held alongside Architecture & Buildings Services Exhibition 2023.

Themed 'Data-Driven Efficiency from Design to Operations', the Symposium aims to drive digitalization and effective utilization of data in the Built Environment (BE) sector to promote effective IDD operations. The Symposium's main objective is to facilitate knowledge sharing and the exchange of ideas on data-driven processes and effective digital solutions that industry stakeholders can benefit from.

**Date: 15 November 2023**

**Time: 9.00am - 4.00pm**

**Location: Marina Bay Sands Expo & Convention Centre, Halls B and C,  
Conference Room B**

This year's Symposium marks the launch of RAPID (Real Estate Analytics and Performance Indicators Dashboard). The IDD dashboard project aligns with the scope and objectives laid out in the Built Environment Industry Transformation Map (ITM). The ITM emphasizes the establishment of a Common Data Environment (CDE) and the standardization of data, both of which are pivotal for fostering deeper Building Information Modeling (BIM) and IDD collaboration. ITM aims to promote data-driven initiatives like RAPID to achieve productivity transformation in the industry, benefiting stakeholders and contributing to the growth of the industry.

We welcome you to participate in this year's Symposium to exchange insights and experiences with the industry.
