

24 November 2023

NEA Invitation to industry briefing on the introduction of MEPS and MELS for water heater and commercial storage refrigerators

The National Environment Agency (NEA) will be introducing energy efficiency requirements for water heaters and commercial storage refrigerators.

2. This forms part of NEA's ongoing efforts to help households and businesses become more energy efficient, contribute to reducing carbon emissions, and mitigate climate change.

3. NEA would like to invite all affected stakeholders to an industry briefing. The briefing will provide stakeholders with the details of the Minimum Energy Performance Standards (MEPS)/ Mandatory Energy Label Scheme (MELS) requirements for these appliances. The briefing session will be conducted at 40 Scotts Road, Environment Building, Singapore 228231 on 12 January 2024 (Friday), 2.30pm – 4.30pm.

4. The briefing will be split into 2 sessions:

- Session 1 (2.30pm – 3.30pm) covers Water Heaters.
- Session 2 (3.45pm – 4.45pm) covers Commercial Storage Refrigerators.

5. Participants may select the session(s) they wish to attend. Due to capacity limit, we are limiting attendance to 2 representatives per organisation. For organisations that wish to send more representatives, please write in and we will try to accommodate where possible.

6. Please register your attendance [here](#) by 15 December 2023 (Friday). For any queries, please email us at nea_energylabel@nea.gov.sg.

Thank you.

Regards
