

## Built Environment Decarbonisation Solutions Wanted!

The Singapore Green Building Council (SGBC), in collaboration with OCBC, presents the SGBC-OCBC Built Environment Decarbonisation Challenge to unearth solutions towards a low-carbon future.

We call on our network of innovators and organisations with tenable building retrofit solutions, innovative approaches as well as advanced technology and materials to accelerate decarbonisation efforts, starting with OCBC's commercial office buildings.

---

### The Challenge

Buildings are responsible for 20 percent of Singapore's carbon emissions, and are a central focus of Singapore's Green Plan as they offer a significant opportunity to reduce carbon emissions, enhance resilience to climate change, optimise resource use, and improve the overall quality of life for residents.

What can we do to accelerate the decarbonisation of our buildings? This Challenge call focuses on uncovering solutions that can reduce operational carbon emissions in buildings in the most efficient and cost-effective manner. Solutions should prioritise **carbon abatement** and **energy efficiency** as well as provide good value and **practicality for deployment**.

---

#### Who Can Participate?

The Challenge is open to companies passionate about built environment decarbonisation and sustainability.

By participating in the Challenge, get to:

- Attest the decarbonisation potential, deployment readiness and commercial case of your solutions in a live environment.
- Network with industry leaders, experts, and innovators in the fields of finance and sustainability.
- Contribute to the global effort to combat climate change and create a sustainable future for generations to come.

Exemplary solutions will also get up to \$80,000 in funding support to implement pilot projects in selected OCBC properties.

Join the SGBC-OCBC Built Environment Decarbonisation Challenge and be part of the solution to reduce building carbon emissions for a more sustainable future. Send in your applications before **Friday, 16 February 2024, 6:00PM.**

Visit <https://www.sgbc.sg/events/ocbc-challenge> for more information.

---

#### **IMPORTANT NOTE**

Solutions considered for the Challenge must focus on improving the energy efficiency and reducing the carbon emissions of existing commercial office buildings. Solutions put forward must be able to demonstrate significant and demonstrable carbon abatement potential, can be deployed and maintained with minimal impact to existing, can be scaled up and replicated in commercial office buildings of various sizes. SGBC will progressively contact applicants on next steps from 26 Jan. 2024 onwards.
