# Data-Driven Digital Transformation for Green and Sustainable Buildings

Wednesday, 27 March 2024 | In-Person Event

Building and property owners are increasingly prioritising sustainability in building operations and maintenance, aligning their efforts with global green building certifications such as LEED, WELL, and Green Mark. These certifications, along with sustainability reports, serve as crucial benchmarks for measuring progress in the built environment sector. The integration of Internet of Things (IoT) solutions with building management systems helps to gather reliable and accurate data essential for sustainability reporting and achieving green certifications. IoT solutions, as such, have collectively emerged as a pivotal strategy to demonstrate tangible sustainability outcomes.

This SGBC Seminar, organised in collaboration with UnaBiz, will feature perspectives and insights from a diverse range of built environment players. Join us as we delve into the current advancements and future potential of IoT deployment in the industry. From better
