**BUILDTRUST®**

# WHAT IS BUILDTRUST®

A CONQUAS equivalent for landed properties and micro projects. The BuildTrust® initiative, developed by the Micro Builders Association, Singapore (MBAS) in collaboration with the Building and Construction Authority (BCA) and various Trade Associations from the built environment sector, aims to create a standardized assessment scheme for evaluating construction quality in landed housing and micro projects.

# WHY IS BUILDTRUST® IMPORTANT?

## STANDARDISED CONSTRUCTION QUALITY

Standardizing quality is crucial for private landed properties and small commercial buildings.

## MINIMISE DISPUTES

The success of construction projects hinges on minimizing disputes between stakeholders and builders upon the completion of construction.

## RECOGNISE AND REWARD BUILDERS

Builders who achieve an outstanding BuildTrust® quality grade will earn recognition within the construction industry. A testament to their quality build and reputation.
