## Upcoming Event

## Collaborate To Innovate: Sustainable Business Strategies with Additive Manufacturing

**Date: 19 July 2024**

**Time: 0800 - 1400hrs**

**Venue: Marina Bay Sands**

Additive Manufacturing (AM), commonly known as **3D printing**, is a process of creating objects by adding material layer by layer, based on digital models. Unlike traditional subtractive manufacturing, which involves cutting away material from a solid block, additive manufacturing builds objects from the ground up using various materials such as plastics, metals, and ceramics.

This event will focus on exploring sustainable business strategies with additive manufacturing. Discover how collaboration between polytechnics, small-medium enterprises (SMEs), and industry leaders can drive innovation and growth in Singapore's manufacturing sector.

Seats are limited. Submit your interest to attend the event below.
