TOWARDS A HEALTHY SINGAPORE: GREEN BUILDING IMPACT ON PUBLIC HEALTH

Explore the intersection between the built environment and public health with us through a series of workshops, exhibition booths, and a panel discussion! Showcasing a range of innovative research and works from start-ups and enterprises, the booths and workshops will focus on sustainability, health and wellness.

Join us for an insightful panel discussion that will revolutionise your view of green buildings and their pivotal role in enhancing public health. This year's spotlight aligns with Singapore's Ministry of Sustainability and Environment (MSE) theme on "Public Hygiene" where we will discover insights and strategies for integrating design and green building practices that not only promote healthier living spaces but also elevate Singapore's public hygiene standards.

This dynamic event is a must-attend for professionals and stakeholders in urban planning, sustainability, and public health. Don't miss this opportunity to gain exclusive access to transformative ideas and solutions that are set to redefine liveable, resilient cities!
