

Build smarter and grow faster with the Built Environment Industry Digital Plan (IDP)

'To streamline our work processes, we knew we had to make a change by going digital,' says Nicole Ang, Business and Innovation Lead, Active Fire Protection Systems.

Having to deal with multiple stakeholders across the workstream is a common business challenge seen across all companies in the Built Environment sector.

See it in action! Find out how local specialist contractor Active Fire has managed to overcome some of these challenges and improve their productivity tenfold.

Introducing the **refreshed Built Environment Industry Digital Plan (IDP)** — a comprehensive guide designed for all SMEs in the Built Environment to enhance their digital capabilities and improve overall efficiency.

This step-by-step guide is aligned with the Built Environment Industry Transformation Map and can help to:

- **Streamline work processes and connect stakeholders across the entire project lifecycle:** Leverage digital tools through Integrated Planning & Design to optimise workflows and collaborate to design accurately and cost-effectively.
- **Boost productivity and safety during the fabrication and construction stages:** Implement intelligent digital solutions, including Smart Inspection and Management and Design for Manufacturing & Assembly (DfMA), to optimise manpower productivity, minimise safety breaches, and enhance overall worker safety while achieving cost savings.
- **Optimise asset delivery and management:** Monitor operations and maintenance in real-time to enhance asset value.

The refreshed IDP also includes a **Cybersecurity and Data Protection roadmap**, which offers measures and tools to help protect against cyberattacks and safeguard customer data.

There is even a **Digital Skills Training roadmap** to guide you and your staff to acquire necessary skills, including change management, to adopt digital solutions at each stage of growth and tailor your training programmes.

Wait no more! Visit Chief Technology Officer-as-a-Service (CTO-as-a-Service) and get your complimentary copy of the [Built Environment IDP](#) today.
