

Dear ACES Members,

As we are preparing to transit to CORENET X, BCA has released a series of infobites to help industry understand CORENET X better. The fourth infobite of the series is shown below.

CORENET 2 vs. CORENET X Key Enhancements

WHAT HAVE WE ENHANCED?
Our enhancements are based on listening to the feedback at our industry engagements

- Consolidated Agency Responses
- Centralised Payment Portal
- Easier Access to Project Information
- Guided Submission Journey
- Improved User Experience
- Increased Transparency

	CORENET 2	corenetX
Submission Portal	ES Pro is required, and users have to update software version regularly	No app installation required Submission portal is fully cloud-hosted
Access to Project Information	Limited to Qualified Persons (QPs) only	Available to all project members (e.g. QP, developer, AC, ACO, builder, RE, RTO)
Appointment Letter	Repeated appointment process for every submission to multiple agencies	Initiate appointments for all project members only once
Agency Forms	Similar project information repeatedly requested from multiple agencies	Repeated form fields are minimised Guided process identifies applicable agency forms
Payments	Payments are made on multiple agency portals and platforms	Centralised payment portal with auto-computation of agency fees
Agency Responses	Decryption requires Netrust Limited access to information for non-QPs	Decryption not required Consolidated agency responses are signed using PDF digital signature
Approved Plan	Difficulty in verifying / identifying latest Approved Plan	Quick verification of Approved Plan using Checksum
