Bringing you the latest news on standards

November 2024

November Highlight

Driving Digital Trade with Standards

On 17 October 2024, Enterprise Singapore hosted the 13th Digital Trade Standards and Conformance Working Group (DTSCWG), which brought together delegates from across the ASEAN region to discuss the essential role of standardisation in digital trade. The discussion delved into how standards in areas like last-mile delivery, e-invoicing and cybersecurity can enhance efficiency and interoperability in the sector. The exchange also highlighted how international standards can drive regional harmonisation and boost cross-border trade flows.

Keep your business ahead in the digital era. Discover our latest standards: **SS 704** *Freight container equipment interchange receipt* and **TR 128** *Common data standard for container logistics flow* that are promoting interoperability in trade and connectivity.
