Date: 26th March 2025
Time: 2:30PM-5:00PM
Location: ntu@one-north (Room Auditorium)

Our Speakers

Melanie Locke
Managing Director

Jasper Loh
Specification Manager

Infiltration, Retention and Reuse

An introduction to ACO Stormbrixx, a **geo-cellular stormwater management system** out of PP, designed for the **efficient collection, storage, infiltration, and controlled release of rainwater**. It's an innovative and low carbon footprint approach on the conventional detention tank made out of concrete, with considerable **savings on time & costs** for the construction industry. ACO Stormbrixx has PUB approval and fully complies with local regulations.
