Envisioning Energy Tomorrow, Building Systems Today

Our energy systems of today continue to evolve rapidly amid technological advancements and economic transformations. Energy security and resilience remain priorities as countries navigate energy market and supply volatility, disruptions in energy technologies and policy shifts.

How can the global energy community deepen cooperation to advance the energy transition, and build secure, resilient, and flexible energy systems for the future? To power the next wave of innovation in mobility and artificial intelligence, there is urgency to redouble efforts to assess and develop low-carbon energy pathways, including hydrogen, carbon capture utilisation and storage, nuclear, geothermal and biomethane.

The Singapore International Energy Week (SIEW) 2025, held in conjunction with Singapore's 60th year of independence, will convene global energy leaders to discuss the theme - "Envisioning Energy Tomorrow, Building Systems Today". Key discussions include strengthening regional interconnectivity, fostering collaboration in energy research, development and deployment, the role of natural gas as a transition fuel, infrastructure and financing issues and building a people-centered and resilient energy system.

Join us as we envision the future energy systems together at the 18th SIEW this 27-31 October.

About SIEW

The [Singapore International Energy Week \(SIEW\)](#) is an official trademarked event organised by the Energy Market Authority (EMA). It is an annual platform for energy professionals, policymakers and commentators to discuss and share best practices and solutions within the global energy space. The 18th edition of SIEW will be held from 27 - 31 October 2025 in Singapore.

About Energy Market Authority (EMA)

The Energy Market Authority (EMA) is a statutory board under the Singapore Ministry of Trade and Industry. Through our work, we seek to build a clean energy future that is resilient, sustainable, and competitive. We aim to ensure a reliable and secure energy supply, promote effective competition in the energy market and develop a dynamic energy sector in Singapore. Visit <http://www.ema.gov.sg> for more information.
