**SGBC**
**Green and Sustainable Finance Course Series**

In-Person, Instructor-Led Courses | 16 May 2025 & 22 July 2025

Green and sustainable finance are common buzzwords in almost any sustainability conversation but do you know what they actually entail?

Gain a deeper understanding of green and sustainable finance principles and their applications at the SGBC Green and Sustainable Finance Course Series, specially curated for non-finance professionals in the built environment sector seeking to better navigate green financing opportunities or champion sustainability initiatives more effectively. These courses will demystify core principles and share real-world applications—helping you unlock funding opportunities, drive projects, and lead impactful green finance conversations.

### Key Learning Outcomes
- Decode key concepts like ESG criteria, green bonds, and impact metrics
- Learn to articulate the business case for sustainability to stakeholders
- Gain practical insights to leverage financing for built environment projects

Green and sustainable finance has the potential to fund and implement initiatives that support the transition to an energy-efficient and low-carbon built environment.

For project owners, consultants, contractors, solution providers and policymakers alike, having a foundational understanding of the

**Course 2**
**Accessing Green and Sustainable Finance with Green Building Certifications**

The proliferation of various sustainable finance taxonomies and green building certifications have resulted in a diverse set of mechanisms to define green buildings for the purposes of accessing sustainable finance.

principles, operational mechanisms, and evolving market dynamics of green and sustainable finance can unlock access to an emerging and growing source of capital. This course has been specifically designed to equip non-finance professionals with the knowledge and skills to tap into green and sustainable finance.

This course will look into the ecosystem of taxonomies, green building certifications and the role of second party opinion providers. The course will also address the extent to which green building certifications match up to regulatory requirements for green and sustainable finance. Case studies will be provided to illustrate how building and project owners can access green finance, as well as transition finance for the greening of existing brown assets.
