

I am Samuel from Standards Development Organisation @ Singapore Chemical Industry Council (SDO@SCIC). I am writing to you on a Singapore Standard 664 Code of practice for long-term measurement of compressed air system efficiency and would like your help to complete a short survey on the standard.

Hope to receive your response. Thank you

Verification study on adoption of SS 664:2020 Code of practice for long-term measurement of compressed air system energy efficiency

Enterprise Singapore (EnterpriseSG) administers the National Standardisation Programme under the direction of the industry-led Standards Council of Singapore. The Singapore Chemical Industry Council (SCIC) is appointed by EnterpriseSG as the Standards Development Organisation (SDO) to manage the Chemical Standards Committee and Environment & Resources Standards Committee, including their Technical Committees and Working Groups.

EnterpriseSG in partnership with SDO@SCIC would like to seek industry stakeholders' input on the adoption of national standards developed and reviewed under the Singapore Standardisation Programme and how these standards are being used by the various stakeholders, in this case, the various Singapore Standards for paints.

To gather comprehensive data, we have developed a survey that will help us gain valuable insights into your experiences and perspectives regarding the adoption and usage of these standards. Your participation will greatly contribute to the success of this study and will enable us to make informed decisions regarding future standardisation efforts.

Please click on the following link to access the survey: <https://forms.gle/2iJ1ATLDJ814K72P6>

Or scan the following QR code:

Survey deadline: 20 Jun 2025

This survey should take no more than 5 minutes. Your responses to this survey are strictly confidential.
