

City Energy is launching our inaugural flagship event, the City Energy Future Energy Forum 2026.

Happening on 6 March 2026 at the Sands Expo & Convention Centre, Marina Bay Sands, the forum brings together leaders, innovators, and partners driving Singapore's energy future.

Building on more than a decade of industry dialogue through the City Energy Technical Seminar, the 2026 edition marks an evolution of this long-running platform. The refreshed format takes a broader, forward-looking view — spotlighting emerging lower-carbon energy solutions, the latest industry trends, and the ideas shaping Singapore's next phase of sustainable growth.

Join us as we energise tomorrow's possibilities.
