

Are you struggling with the complexities of multi-disciplinary coordination? It's time to bridge the gap between design, analysis, and execution.

Join our upcoming webinar, "Connected Construction: From Structural Analysis and Design to BIM to Multidiscipline Collaboration," where we'll show you how to maintain perfect alignment across your structural, architectural, and MEP teams.

**What you'll learn:**

- Seamless BIM-TSD Interoperability: Optimize bidirectional data exchange to reduce manual reentry, prevent errors, and maintain structural integrity from analysis to detailing.
- Actionable Insights for JKR Malaysia Standards: Discover best practices for data structure and classification to meet local regulatory requirements and accelerate project approvals.
- Integrated Coordination: Master cross-disciplinary synchronization to resolve clashes early, ensuring your designs are both constructible and perfectly coordinated.

**Event Details:**

Date: 15 July 2026

Time: 2:00 PM – 3:00 PM SGT

Don't miss this opportunity to refine your firm's structural design efficiency.
