## The Future of Contracting Starts Here

### 4 Sessions Contractors Shouldn't Miss at IBEW 2026

AI is reshaping how projects are managed. Robotics are moving from pilot projects to real-world deployment. At the same time, contractors face ongoing pressure to improve productivity, manage workforce challenges and deliver projects with greater certainty. The future of construction is radically changing.

At **IBEW Conference 2026**, discover how industry leaders are tackling these challenges and what it means for the future of contracting.

### Can AI become your next project team member?

#### Breakout 1.5: Agentic AI in Construction & Project Management

Wednesday, 2 September 2026

16:00 -16:45

Woh Hup Theatre, Level 3

Sponsored by:

In **Session 1.5: Agentic AI in Construction & Project Management**, sponsored by **Oracle**, **Leo Liu, CTO of Gammon Construction Limited**, explores how the next generation of AI could transform project planning, scheduling, resource optimisation and decision-making.

Moving beyond simple automation, Agentic AI has the potential to proactively support project teams—helping them identify risks, coordinate resources and make faster, more informed decisions. If you're wondering how AI will impact construction over the next few years, this is a session you won't want to miss.

Plus, tackle some of construction's biggest challenges:

**Construction projects are complicated jigsaw puzzles. Can better collaboration help?**

**Session 2.7: Engineering Collaborative Teams** brings together perspectives from across the built environment ecosystem to explore how the importance of NEC4.0 and how leaders bring collaboration to life, reducing friction, improve productivity and delivering better project outcomes.

**Robots on site: hype or game changer?**

In **Session 2.4: "People + Robots = ?" Making the Equation Work**, hear from organisations at the forefront of construction robotics as they share how automation is already enhancing productivity, safety and workforce capabilities—and what it takes to make technology work in practice.

**What if project delays could be reduced before work even begins?**

Discover how leading project teams are using Takt Planning and the Last Planner System (LPS) in **Breakout 2.3: How Takt and LPS Philosophies Empower Site Teams** to create smoother workflows, improve trade coordination and increase predictability on site.

**The future of contracting isn't a distant possibility — it's already taking shape.**

From AI-powered project management and robotics adoption to collaborative contracting and Lean Construction, these sessions led by industry leaders will broaden your horizons and help your organisation confidently navigate the future of construction.
