People + AI + Robotics = Smarter Buildings

Tickets Running Low!

The Buildings of Tomorrow Are Already Here.

For owners, developers and facilities managers, the challenge is no longer simply about building smarter — it is about **making buildings work smarter every day**.

From **robot-friendly buildings to smart FM teams**, hear from our IBEW Conference speakers on how technology, people and new ways of working are shaping the future of building operations.

A truly smart building relies on a skilled workforce capable of interpreting data, managing technology and engaging occupants as active participants in performance and sustainability.

Bringing together building owners, technology providers and tenants, this panel explores the human side of digital transformation. From upskilling technicians into data-enabled professionals to encouraging smarter occupant behaviours, discover what it takes to create a **future-ready facilities management ecosystem**.

Programme Overview

From Smarter Assets to Smarter Outcomes

AI is opening new possibilities across existing buildings, helping organisations improve efficiency, optimise performance and unlock value.

But lasting impact requires the right skills,
behaviours and operating models to turn
insights into action.

**The future of facilities management is not
just digital. It's operational, collaborative
and human-centred.**

**Join industry leaders to discover how AI-driven operations and empowered workforces
are shaping the next generation of building performance.**
