by addressing the ecosystem of sustainable finance taxonomies, green building certification and the role of second party opinion providers which offer diverse mechanisms to define green buildings for the purpose of accessing sustainable finance.

Case studies will be provided throughout to illustrate how building and project owners can access green finance, as well as transition finance for the greening of brown assets. The intention of the course is to help build bridges across the nomenclature of finance, sustainability and raise awareness as to how global taxonomies (e.g. EU, ASEAN) are now more transparently mapped against the various green building rating tools, easing the path towards accessing sustainable finance.
