Meet Our Keynote Speaker John Reynolds at SUMW 2026

Dear Industry Partner,

Hear from **John Reynolds, President of the California Public Utilities Commission (CPUC), United States**, as he delivers the Opening Keynote Address at **Singapore Urban Mobility Week (SUMW) 2026**.

Discover how California has emerged as a leader in autonomous vehicle innovation through supportive regulation, technology and investment, favourable market conditions, and a mobility landscape ready for change.

Hear first-hand about California's autonomous vehicle journey and the lessons it holds for the future of autonomous mobility. Explore how its licensing framework supports the transition from testing towards commercial deployment, and how thoughtful regulation can enable innovation while advancing:

From Testing to Commercial Deployment

Discover how California's licensing framework has helped move autonomous vehicles from testing towards commercial deployment.

Innovation & Regulation

Explore how thoughtful regulation can support innovation while advancing passenger protection and road safety.

Lessons for the Future of Mobility

See how California's experience can inform the future of autonomous mobility, while advancing safety, sustainability and access to mobility.

Gain insights to inform your organisation's approach to autonomous mobility, from policy and planning to deployment.

Explore Three Days of Industry Insights & Connections

SUMW 2026 brings together global policymakers, transport authorities, operators, technology providers and industry leaders to connect, exchange insights and explore the future of urban mobility through:

Leaders Summit

Hear from senior policymakers, transport authorities and industry leaders as they explore the future of mobility through the commuter's perspective, rail renewal and digitalisation, workforce transformation, and autonomous vehicles in high-density cities.

Industry Forums

Gain practical insights into the technologies and solutions transforming urban transport from battery safety and bus electrification to connected mobility, AI-enabled operations, sustainable infrastructure, rail modernisation and EV charging.

Connect with industry peers, discover new perspectives and take the next step towards your mobility goals.
